NEW

POP-UP BOXES

The most elegant and functional solution for all surfaces

With exclusive features and an elegant design, the new POP-UP boxes bring together ease of use and installation elegance.

The structure in 5 different finishes, compact and extremely thin, perfectly integrates with all working environments.

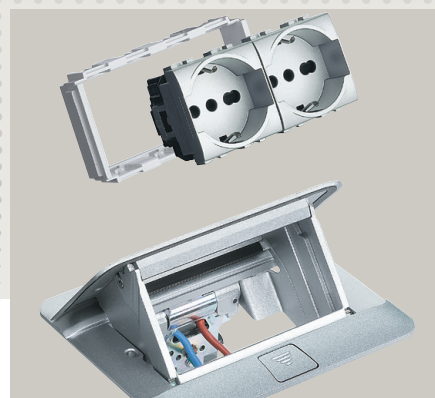

EXTRA-SLIM DESIGN

Elegant solution with "extra slim" design, with a protrusion of only 5 mm from the flush mounting surface.

PUSH & SLIDE COVER

Patented system with controlled opening for maximum safety in floor installation.

DESKTOP AND FLOOR INSTALLATION

Installable both in floating or concrete surfaces and floors, it can be completed with 4 modules of the MÀTIX or LIVINGLIGHT range.

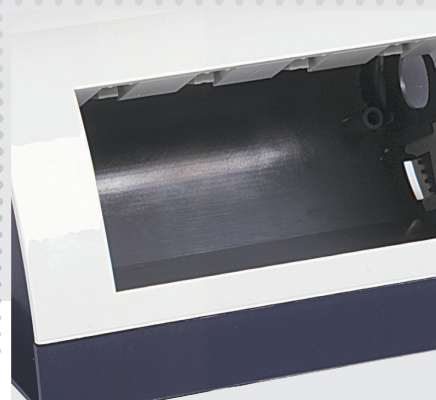

SWITCH

The luminous switch gives the possibility of easily switching the connected devices on and off, avoiding extended stand-by situations, reducing energy consumption and ensuring better product safety.

USB CHARGER

Multisockets are also available in the version with 5V USB power socket. The USB socket gives the possibility of charging electronic devices without the need for dedicated power supply units.

MODULAR SOLUTIONS

When other types of connections or devices are required, modular and aesthetically coordinated solutions are also available, for the installation of products of the BTicino civil series.

USB PRE-WIRED MULTISOCKETS

The BTicino multisockets, available in 9 versions with different performances and accessories, meet all the needs of personnel working at the desk.
