WALL MOUNTING AND PORTABLE RUBBER COMBINATIONS

Our story

GIMAX started in Italy in August 1990 in a small laboratory where electronic ballasts for fluorescent lamps at very low voltage were produced. The company developed design and production of electronic circuits with very high quality standards lodged into small enclosures. In 1991, the first range of portable and fix lamps was launched on the market.

The butyl rubber was combined with unbreakable polycarbonate to give the product a robustness and compactness unknown in this sector up until then. This combination became the quality trademark of GIMAX production. Gimax has got a great experience over the years in molding thermoplastic materials, reason why the management decided to make new

investments in new molds to start manufacturing an innovative solution: the power distribution boxes in hard butyl rubber.

The success was immediate as the new product was placed in a competitive context characterized by the presence of electrical panels made with low quality resins that did not have any chance to compete with the intrinsic qualities of rubber.

It was the beginning of the '90s when the building industry represented a thriving and extremely interesting market in Italy.

The growing awareness in public opinion on security issues in workplaces and the laws to protect workers

CERTIFICATO N° 50 100 9199

CERTIFICATO N° 50 100 14389

led Gimax to develop a new product range, the series ASC (Standard equipment for construction sites – Industrial combinations for building yards), made in compliance with Standards CEI 17-13 / 4 (old Standard EN 60439-4 current Standard EN 61439-4). The product also aroused great interest in the shipbuilding industry where the company already supplied lighting equipment. Such a Further success increased the number of customers and expanded the offer of the company. Trolleys for electric distribution were manufactured as well as wall and portable transformers. The wide experience gained thanks to the continuous challenge of providing bespoke solutions according to

specific requirements allowed the company to acquire a high level of know-how being involved in several sectors such as: industrial, railways, defense, public bodies, etc. The constant technological evolution in molding technopolymers found a favorable environment at Gimax, in fact the special mixture has been constantly improved in order to offer the end user a product in line with the latest technological developments. Gimax has recently confirmed to be a company engaged in research and development by proposing a product range suitable for electrical distributions made of technopolymers and combining the very high resistance to impact and wear with lightness.

Our way of operating on the market and our values

From a commercial point of view, the contact with the Customer is carried out through the technical department of the Company, capable to guarantee an elevated level of competence in this field aside from a daily presence on the territory. The visit of the Customer by the Company is of particular importance to understand in which way the final operators of the product work, their most frequent problems, their needs not only expressed but also the collateral ones. The starting point is always and solely the final Customer, and the sales of the product starts first of all from a "consultative" approach. The best possible solution for the Customer is found through a meeting with the Technical Department, composed of highly qualified experts in this sector. This ends up to the realisation of the final product, in most cases a product made as bespoke.

This is one of the strengths at Gimax: the ability to combine high quality standards with competitive costs, product manufactured through the continu-

ously updated industrialisation processes based upon the development of new technologies, with attention to detail and technical specifications required, always providing a fast and punctual service. The Company is located in Pietrasanta and is dedicated to the production and assembly of electrical switchboards, lighting products and electronic circuits. The experience gained in direct contact with the end user has allowed a constant improvement in quality standards and number of produced items. Today we can grant our customers a wide offer to satisfy their needs.

The variety of the acquired experiences and a particular attention to the aftersales phase allowed GIMAX to develop new product types in line with the most recent trends. Since always, Gimax has invested great part of its resources in Research and Development activities being proud to be a leader on the market in terms of innovation capabilities. The Company has consolidated its own experience in many specific sectors:

- BUILDING SITES
- SHIPYARDS
- INDUSTRIAL MAINTENANCE
- REFINERIES
- PUBLIC AND PRIVATE BODIES
- MILITARY AND CIVIL PROTECTION
- FILM PRODUCTION
- MACHINE TOOLS

In these sectors, GIMAX has always been a point of reference for many leading companies for several years.

Certifications and Compliance

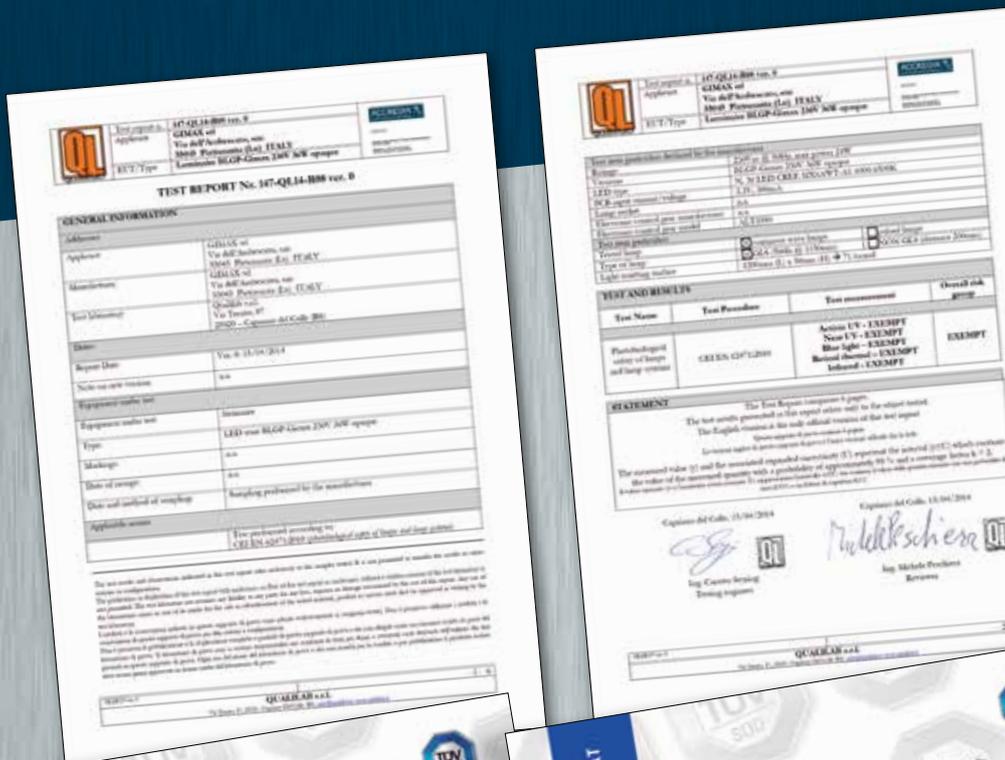

CERTIFICATO Nr. 50 100 9199

CERTIFICATO Nr. 50 100 14389

Commitment, perseverance and dedication are the guidelines of the company to offer new solutions always respecting the most restricted Standards on domestic and foreign market.
(The TUV Institute in Italy has certified the complian-

ce of the management system to the Directives "UNI EN ISO 9001 2008").
Our starting point will always be the same: the Client, his needs and the best possible answer to the specific problems.

A photograph of an industrial facility, likely a power plant or refinery, during sunset. The sky is filled with vibrant orange and yellow clouds, transitioning to a deep blue at the top. In the foreground, there are several tall, cylindrical structures. One is white with a red band near the top and has a red light at its peak. Another is taller and white. The facility is illuminated with warm lights, and the overall scene is industrial and dramatic.

ELECTRICAL COMBINATIONS WALL MOUNTING, MOVABLE AND PORTABLE

DISTRIBUTION AND TRANSFORMATION

Wall mounting distributions

Product features

- Hard **butyl rubber** enclosures, double insulation, IP65
- Metal brackets for wall mounting
- Hinged transparent polycarbonate lid with closing spring to protect MCBS
- Inlet through cable gland IP68
- Modular inner terminals
- Outlets with receptacles CEE P17 or terminals through cable gland IP68
- Outlets protected by miniature circuit breakers
- Built in compliance with Standards **CEI EN 61439-1 / CEI EN 61439-2**

ELECTRICAL EQUIPMENTS FOR CONSTRUCTION SITES

Electrical distributions for construction sites (EN61439-4)

MAIN PANEL AND DISTRIBUTION

Product features

- Cabinet in steel plates, thickness 15/10, painted and oven baked with polyester powder specifically for external use
- Stand in boxed steel, thickness 30/10 (C shape) painted and oven baked with polyester powder specifically for external use
- Lockable hatches
- Eyebolts for lifting and rear brackets for wall mounting
- Hard **butyl rubber** enclosure, protection degree **IP65**
- Hinged transparent polycarbonate lid with closing spring to protect MCBs
- Inlet with cable gland IP68
- Inner modular terminals
- Outlets with receptacles CEE P17 IP67 or direct wiring through cable gland IP68
- Manufactured according to Regulations EN61439-4 (Assembled Equipment for Building Sites)
- Standard items include stand. To order combinations without stand, please remove "C" from item code
- Further configurations available on demand

Movable distributions made in Technopolymer

Beside the classic rubber range, Gimax has recently introduced a new product line of combinations made in technopolymer (polyethylene). The new material represents a very interesting alternative to rubber product usually in use in the industrial environment.

The new combinations of the Series Modulus are the perfect solution for use in following sectors:

- Film and TV production
- Building yards
- Industrial maintenance
- Military
- Civil protection

In general such products are very well appreciated in case of temporary use for their peculiar characteristics being stackable and easy to carry thanks to the light weight and side handles.

The modularity of the Series Modulus allows to build even the most complicated configurations regarding type and number of receptacles.

Gimax's proposal is always in compliance with the most restrictive international Standards ensuring a long lasting use of products even in very harsh environments. The combination of lightweight and robustness makes the Series Modulus the ideal working partner to cope with success the most difficult challenges.

MILITARY AND EMERGENCY SERVICES

The Series Modulus is a real rapid deployment system (RDS) suitable to be used in disaster relief services where a fast set up can do the difference. The product features (manageability, stackability, lightweight) are very appreciated from operators such as Army, Firefighters, Civil Protection (typical use is in temporary tents).

SHOW BUSINESS

The show business is a very important sector for Gimax having dedicated an entire catalogue of special solutions with combinations fitted with black receptacles. The Series Modulus is widely configurable in order to satisfy the most difficult customer's enquiries.

INDUSTRIAL MAINTENANCE

Industrial maintenance operators well know the matter of taking care of the plant in difficult and distant positions. The Series Modulus is very helpful being a complete portable electric lab where the operator has all at hand. Sturdiness and lightweight are the typical features of technopolymers. The Series Modulus is the ideal partner for electrical maintenance in industry sector.

Movable distributions made in Technopolymer with transformer

Product features

- Polyethylene enclosure, double insulation, IP67
- Hinged transparent polycarbonate lid with closing spring to protect MCBs
- Minimum IP44
- Outlets with receptacles CEE P17 IP44 or IP67
- Outlets protected by miniature circuit breakers or fuses
- Handles for transportation
- Stackable
- Built in compliance with Standards **CEI EN 61439-1 / CEI EN 61439-2**
- Internal transformer built in compliance with Standards **CEI EN 61558-1, 61558-2-4, 61558-2-6**

CABLE REELS

Product features

- Drum in hard **butyl rubber**, double insulation
- Very resistant metal painted frame with handle for transportation
- Stop knob on the drum
- Outlets: CEE P17 receptacles **IP44** or **IP67** protected by thermal switch
- Inlet: CEE P17 plug **IP44** or **IP67** and neoprene cable type H07 RN-F
- Built in compliance with Standards **CEI EN 61316**
- **Further versions suitable for 24V - 48V (very low voltage) available**

EXTENSION CORDS

Product features

- Power electric cable type H07RN-F with red copper or annealed tin-plated rope-conductors insulated with rubber of quality EI4 and external sheath in neoprene of quality EM2. The particular mixture in use guarantee an excellent resistance against oils, acids, fats, petrols and industrial solvents
- Very good mechanical resistance to abrasion, shear, crushing, shocks and bending. Inalterability of the sheath flexibility at low temperatures.
- Plug and receptables CEE P17 IP67

ELECTRIC CABLES

Product features

- Electric cables with outer sheath made in special mixture with a very good resistance to oils, acids, greases, petrol and industrial solvents
- Excellent mechanical resistance against abrasions, cuts, shocks and pleatings; long lasting sheath flexibility also in case of low temperatures
- Technical features according to cable types: Series GF, SF and BIN
- Wide range of sections available in stock as per product tables
- Other sections available on demand for cables Series Gommaxflex GF and Flex NF

Series Gommaflex GF

Item	Section
GF2X1	2 X 1mmq
GF2X1,5	2 X 1,5mmq
GF2X2,5	2 X 2,5mmq
GF3X1	3G1mmq
GF3X1,5	3G1,5mmq
GF3X2,5	3G2,5mmq
GF4X2,5	4G2,5mmq
GF5X16	5G16mmq
GF5X25	5G25mmq

Type Neoprene	H07RN-F
Working voltage	450/750 V
Working temperature	-25 +85 °C
Bending radius	10 times diameter
Self-extinguishing	Norm CEI 20-35

Series Flex NF

Item	Section
NF2X1	2 X 1mmq
NF2X1,5	2 X 1,5mmq
NF2X2,5	2 X 2,5mmq
NF3X1	3G1mmq
NF3X1,5	3G1,5mmq
NF3X2,5	3G2,5mmq

Type PVC	FROR
Working voltage	300/500 V
Working temperature	-5 +70 °C
Bending radius	9-10 times diameter
Self-extinguishing	Norm CEI 20-35

Series Binato BIN

Item	Description
BIN2X6	Section 2x6mm ² external sheath in black color Suitable to be used with insulating piercing clamps PAT121/6-GIMAX
BIN2X16	Section 2x16mm ² external sheath in black color Suitable to be used with insulating piercing clamps PAT129-GIMAX
BIN2X25	Section 2x25mm ² external sheath in black color Suitable to be used with insulating piercing clamps PAT129-GIMAX
BIN2X6/YE	Section 2x6mm ² external sheath in black color Suitable to be used with insulating piercing clamps PAT121/6-GIMAX

Type PVC	FRDR-FX
Working voltage	Max 48 V
Working temperature	-5 +40 °C
Bending radius	8 times diameter
Self-extinguishing	Norm CEI 20-22/II

PLUGS AND SOCKETS CEE P17

Plugs and Sockets CEE P17

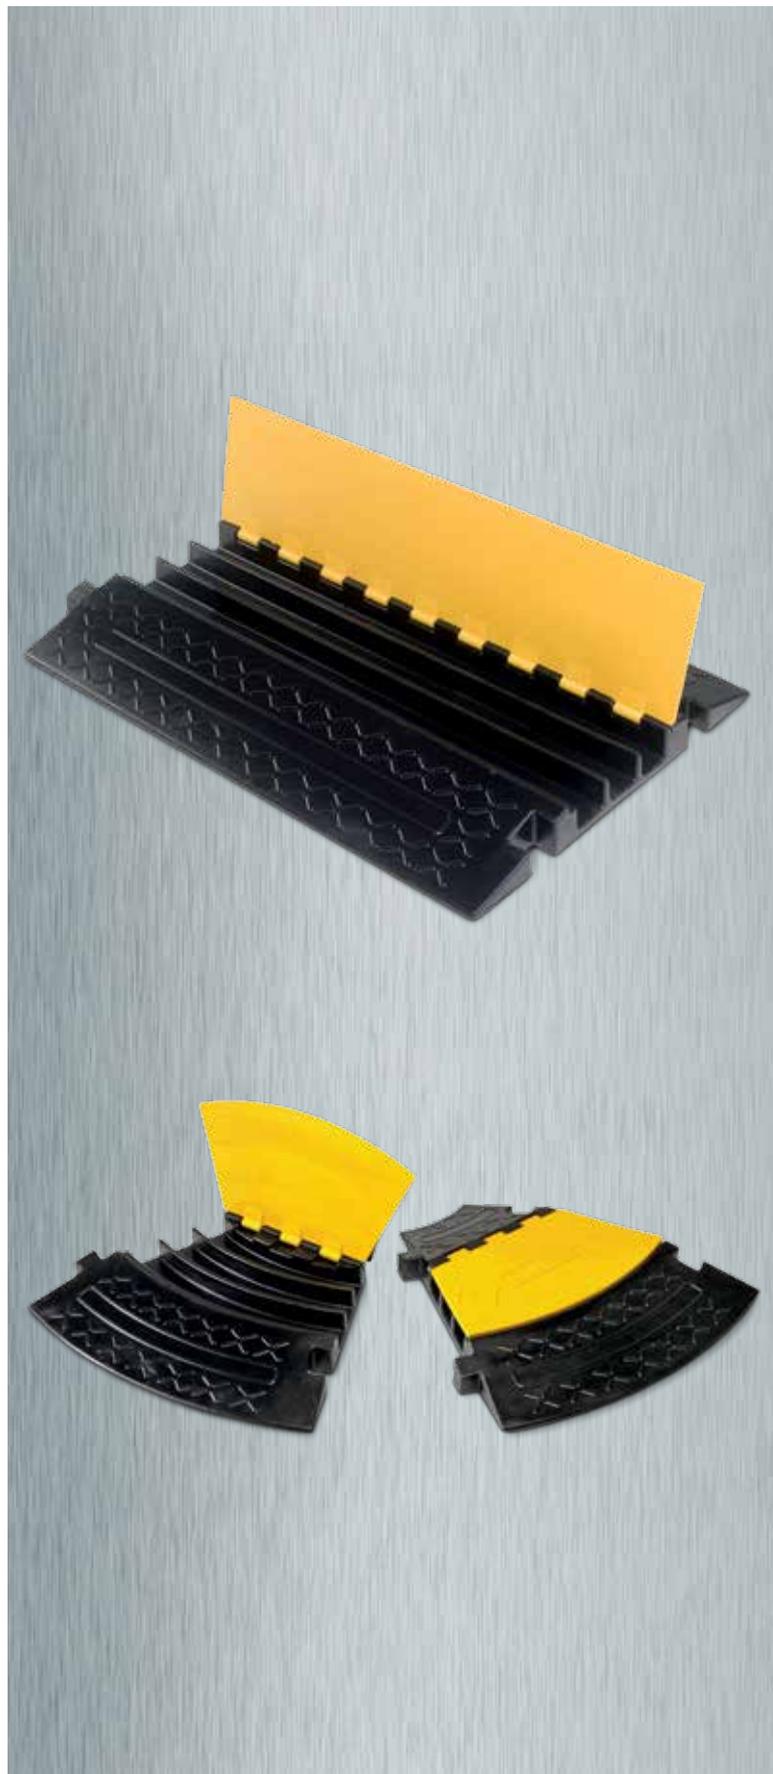

Product features

- Plugs and sockets CEE P17 according to Standards **CEI EN 60309-1** / **CEI EN 60309-2** DIN VDE 0623
- Working frequency 50/60Hz
- Insulation voltage 690V
- Protection degree IP44 or IP67 (IEC 529 and CEI EN 60529)
- Resistance against heat 850°C Glow Wire (IEC 695-2-1 and CEI 50-11)
- Cable external diameter: 16A 4-17mm, 32A 5-24mm, 63A 9-37mm, 125A 22-50mm
- External sheath made in resin suitable for industrial use
- Brass pins and sleeves

Gimax rubber cable protectors

Product features

- Totally made in NATURAL RUBBER (NR/SBR) with 3 cable ducts
- Base in black color, Halogen Free. GLOW WIRE TEST 960°C.
- Cover in bright yellow color fixed through hinges, opening 90°
- High mechanical resistance to abrasion
- Modules provided of dovetail joints to guarantee a stable and aligned connection

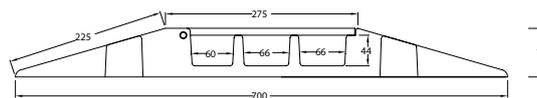

Datasheet

- Material in use.....: NATURAL RUBBER (NR/SBR)
- Operating voltage.....: 1000VAC - 1500VDC
- Insulation voltage.....: 3kV
- Protection degree.....: IP30XC
- Possible rolling load.....: 5 tons on a surface 20x20cm
- Glow wire test.....: 960°C
- Surface hardness.....: 80-90 (SHORE A)
- Reaction degree to fire.....: CATEGORY 1 according to (CSE RF 2/7/5/A; UNI 8457/87)
- Cover color.....: YELLOW
- Weight.....: 25 kg (Item CG1000) 13,5 kg (Item CG45C)

Series CG

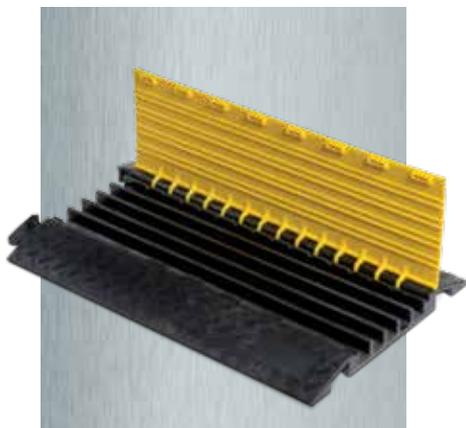

Item	Description
CG1000	RUBBER CABLE PROTECTOR 3 DUCTS LINEAR 1MT
CG45C	RUBBER CABLE PROTECTOR 3 DUCTS CURVE 45°

Polyurethane cable protectors 5, 3 and 2 ducts

Robust lightweight cable protector for vehicles transit

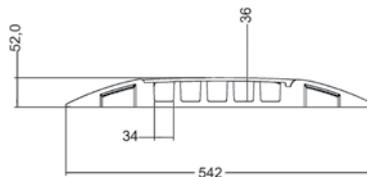

- Modules provided of dovetail joints to guarantee a stable and aligned connection
- Cover in yellow color with hinge closing
- Resistant to oils, acids and gasoline
- Type of material TPU (Thermoplastic polyurethane), very good resistance and stability
- Flammable class by model: B2
- Working temperature: -40°C +70°C

Series CG / Model 5 ducts

Item	L x W x H	Ducts	Weight	Load
CG10005	870 x 542 x 54 mm	5 x (34 x 36) mm	11,5 Kg	5 tons on a surface 20x20cm

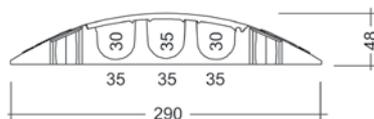

Item CG45C/05 - Curve for change of direction 45° with 5 ducts - Weight 3,55 Kg

Series CG / Model 3 ducts

Item	L x W x H	Ducts	Weight	Load
CG10003	1.000 x 290 x 48 mm	1 x 35x35h mm 2 x 35x30h mm	5 Kg	2 tons on a surface 20x20cm

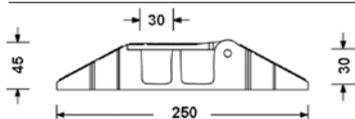

Item CG10003/45SX - Curve for change of direction 45° with 3 ducts - Weight 2,53 Kg

Series CG / Model 2 ducts

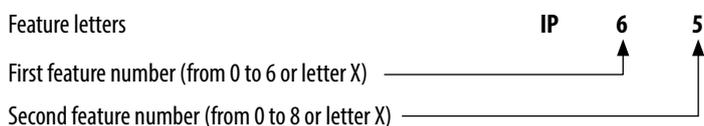

Item	L x W x H	Ducts	Weight	Load
CG10002N/1/GX	1000 x 250 x 54 mm	2 x (30 x 30)mm	4,5 Kg	3 tons on a surface 20x20cm

Item CG10002N/1/45SX - Curve for change of direction 45° with 2 ducts - Weight 2,50 Kg

USEFUL INFORMATION

Standards CEI EN 60529 1997-06 (IEC529 ex CEI 70-1) + A1 2000-06 "Protection degree of enclosures" refers to a classifying system regarding protection degree of enclosures in use for electrical equipment. This allows to indicate, through the IP code, the level of protection against penetration of external solid bodies and water. IP code has to be guaranteed in the "ordinary service conditions of the equipment".

The first number indicates protection degree against penetration of external solid bodies

SYMBOL	IP	SIGNIFICANCE
	0	No protection
	1	Protected against solid bodies higher than Ø 50mm
	2	Protected against solid bodies higher than Ø 12mm
	3	Protected against solid bodies higher than Ø 2,5mm
	4	Protected against solid bodies higher than Ø 1mm
	5	Protected against dust (no hazardous deposit)
	6	Completely protected against dust

The second number indicates protection degree against penetration of liquids

SYMBOL	IP	SIGNIFICANCE
	0	No protection
	1	Protected against vertically dripping water
	2	Protected against vertically dripping water or rain up to 15° from the vertical
	3	Protected against spraying water or rain up to 60° from the vertical
	4	Protected against splashing of water from all directions
	5	Protected against water jets
	6	Protected against powerful water jets
	7	Protected against temporary immersion effect
	8	Protected against continuous immersion effect

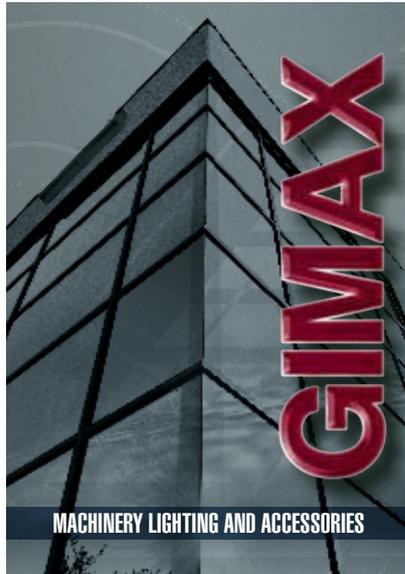

Class of insulation

SYMBOL	CLASS	DESCRIPTION OF PROTECTION DEGREE
	I	Component with main insulation provided of device for mass connection to a protection conductor.
	II	Component with double or reinforced insulation with no device for connection to a protection conductor.
	III	Component with reduced insulation as exclusively powered by a very low voltage safety system (SELV) in which voltage values are never higher than those generated by that system.

STAGE EQUIPMENT SOLUTIONS

LED LAMP SERIES GXL

“ We hope that you have found the best solution for your needs amongst our various proposals in this catalogue.

We are proud to underline that our main force, that has made our Company grow these years, is the design and realisation in our company of all our products, starting from the necessities of our clients.

In case you have not found a product that suits your needs, our offices are at your disposal to assist you in finding the best possible solution.

Contact our commercial and technical department at the following number: 0039 (0)584 81743 and test our competence and professionalism. ”

Thank you and...

...See you soon
